■ Features

KUWI 2.0 Pro wireless video tech
Proprietary anti-interference RF
5.1-5.9GHz License-Free DFS Comply
Auto scan and select optimal channel
3G-SDI & HDMI video transmission
USB-C Video Capture out for PC/Mac
Up to 3km line-of-sight long range

H.265 up to 26.8Mbps visual lossless quality
Consistent 32ms ultra low latency
Uncompromised 1T to 4R Multicast
MetaData & Timecode trigger transmission
High bright OLED display & configuration
AES-256 dual encryption protection
NP-F / V-mount, 2-pin LEMO, USB-C Power

KUWI 2.0 Professional Chip, Stable As Always

The New Generation KUWI2.0 professional chip for wireless video, 5.1-5.9GHz License-Free, inherits the stability advantages of SWIT wireless products, ensures the stable transmission in the most complex environment.

Proprietary RF Protocol

Professional KUWI proprietary RF, **NOT WIFI** tech, will not interfere with personal smart devices or wireless devices in public facilities.

Auto Frequency Switch

With frequency scanner built-in, constantly detect the interference conditions and auto switch to the optimal channel seamlessly.

Receiving Feedback Tech

The Rx continuously reports the receiving status to the Transmitter, and the system will adjust the RF power and encoding bitrate based on the actual receiving distance.

Uncompromised 1T to 4R Multi-Cast

The CREW supports 1 Transmitter to up to 4 Receivers Stable Multi-Cast Transmission, with no compromise on Distance, Latency or Video quality for film crew application. All the CREW family Tx and Rx are fully cross-compatible for multicast.

CREW The Stable Long Range Multi-Cast Wireless Video **SWIT**®

Consistent Ultra Low Latency

32ms Visually Lossless Latency for Wireless Focus Puller
Never Changed Latency, Regardless of the Environment
Ensure Synchronization of multi-camera wireless channels

CREW

Others

Lossless Image Quality

H.265 High Quality Encoding, Up to 26.8Mbps
Visually Lossless Compared to Cable Video

3G-SDI / HDMI / USB-C Video Capture MetaData and Timecode Trigger

Tx: 3G-SDI in×1 loop×1, HDMI in×1
Rx: 3G-SDI out×2, HDMI out×1, USB-C video capture out×1
Whether Tx input SDI or HDMI, all Rx interfaces can output
SDI supports MetaData and Timecode Trigger Transmission

3km Long Range High Gain Panel Antenna with Rx Built-in

3G-SDI out×2, HDMI out×1, USB-C video capture out×1
MetaData and Timecode Trigger Transmission Support

USB-C Video Capture For Livestreaming

The receiver provides USB-C port video capture output,
can be connect to a computer for livestreaming productions,
1080P50/60 High Quality Video Capture, Driver-free for both PC and Mac

OLED Display and Configuration

450nits high bright OLED, clear viewing under sunlight
Video Format, Channel, Battery Level Multi-cast Status
Automatically and Manually Select Frequency Channel
High Quality / Strong Wall-cross Mode Selection
Tx/Rx Pairing, Fan On/Off, Firmware Update Operations

■ Specifications
