Congratulations on your purchase of this product. Please read this user manual carefully

## Warning & Caution

- Use the product in a dry and well-ventilated environment, avoid rain and moisture.
- Ensure the firm connection between the product and camera, as well as external power supply.
- Do not attempt to disassemble the product to prevent internal circuit damage.
- Use the product at normal temperature, avoid extreme high and low temperature environment.
- Check the product appearance before use, do not use the damaged one.

## Product Brief

The KA-F20S is a V-mount to NP-F conversion plate that transforms standard 12–16.8V V-mount batteries into regulated 8.4V NP-F power output. Universally compatible with all NP-F equipped video devices, to extend runtime by a higher capacity V-mount battery.

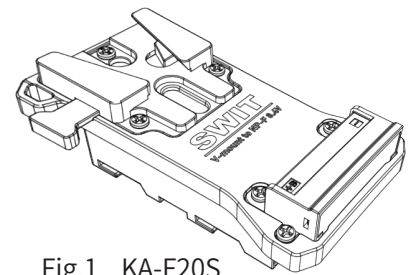

Fig.1 KA-F20S

## Features

- V-mount battery 12V-16.8V input
- NP-F pins Regulated 8.4V 4A output
- All metal housing, solid and reliable
- V-mount step-down design to keep balance

## Specification

Model	KA-F20S
V-mount Input	12V-16.8V
NP-F Output	8.4V(Reg.)4A
Dimension	100mmx55mmx37mm NP-F part:20mm deep
